

Entando 6 is the leading micro frontend platform for Kubernetes that helps enterprises rapidly innovate using modern technologies.

Entando Professional Services helps your team in getting the best value out of Entando 6 by understanding your business and technical challenges helping you in making the best decisions to achieve project success.

Our team will help you to review and validate your design to avoid unexpected issues and identify potential risks.

Entando will support you across all aspects of your business providing guidelines and recommendations to enable your growth and accompany you on your digital journey.

What will you get?

- A detailed analysis of your specific business needs and recommendations for implementations
- A proposal of specific blueprints to best meet business needs.
- How to adapt your solution based on Entando 6 to your CI/CD pipeline
- We will deliver a detailed plan with Architectural review
- Advising on how build reusable components to accelerate time to market
- High availability and performance recommendations
- Architecture for logical, physical and solution recommendations

Benefits

- Understand your business and your existing technological landscape
- Kick off your Entando upgrade on the right foot
- Identify the best approach to overcome the technical challenges specific to your case
- Support you with best practices and past industry experience.

Starting in the right way

Kicking off a project in the right way is a challenge. Defining the right physical and solution architecture that can speed up the time to delivery and get an enterprise-ready solution in terms of security, high availability and performance. Entando Professional Services can support your team by providing the expertise of the team that actually created Entando 6, and got experience on the field from past projects.

Building and Enterprise-ready Kubernetes-native solution

The Entando Architectural Review will conduct a review of your business needs and your software and hardware architecture and configurations. Our team will support your team to plan and execute the best strategy to build your solution in a cloud-native environment providing best practices, patterns for reuse of components and integration with your internal systems. The objective is to help your DevOps engineers to design your solution to adapt to your CI/CD pipeline, and allow your architect to design reusable components.

About Entando Professional Services

Entando's Professional Services team works with customers to foster success in their digital journey. As a global team with extensive experience in a variety of industry sectors, such as telecommunications, e-commerce, travel, and digital entertainment, Entando Professional Services guides you through critical milestones and decision points, augmenting your team and providing support or ownership of governance, architecture, infrastructure, delivery and training.
